## INTRODUCTION AND HIGHLIGHTS

### **Source Data:**

The crime related data contained in this report are derived from a number of computer sources. These systems include, but are not limited to:

eCOPS	-	Enterprise Case Occurrence Processing System
COPS	-	Computerized Occurrence Processing System
CIPS	-	Criminal Information Processing System

These systems are continuously being updated and as a result some changes to statistics published in previous statistical reports should be expected.

Crime statistics contained in this report are based on the date that the information was reported or became known to police. This is done to minimize changes in reported statistics year over year and to enable some degree of comparability with statistics reported by Statistics Canada.

Other data comes from a mixture of automated and manual systems maintained by the individual units responsible.

### **Comparing Crime Statistics:**

The statistics in this report count all offences reported to the police. As a result, a single incident reported to police may generate more than one offence.

It is not recommended that the crime statistics in this report be compared to crime statistics prepared by other agencies due to the fact that different methods of categorization, geographic, technical, data and time constraints may affect the outcome.

Although comparing exact numbers is not recommended, the general trends and magnitude of change should be similar regardless of the counting method.

Detailed information pertaining to Statistics Canada crime reporting method can be found in the Uniform Crime Reporting Survey documents posted on the Statistics Canada website, <http://www.statcan.ca>.

### **Highlights:**

In 2007 there was a 5% decrease in overall reported crime. This translates to a reduction of approximately 10,000 offences.

Murders showed a marked increase, 20% over the previous year from 70 to 84. This is 21 more murders than the average of 62.6 over the past 14 years.

Sexual Assaults are down for the second year in a row by 3.8% after dropping 7.5% in 2006.

Robberies of Financial Institutions decreased by 8.8 % and overall all robberies dropped by 3.6%.

The overall number of traffic collisions increased by 4.3% after drops in the two previous years. In spite of this, traffic fatalities decreased from 57 to 52 persons killed and 57 to 48 collisions. Personal injury accidents decreased from 11,994 to 11,632 or -3.0%.

A new section has been added to the report outlining types of firearms being stolen, recovered, used or seized in Toronto.
